

RIGID[®]

SeeSnake[™] *Plus*

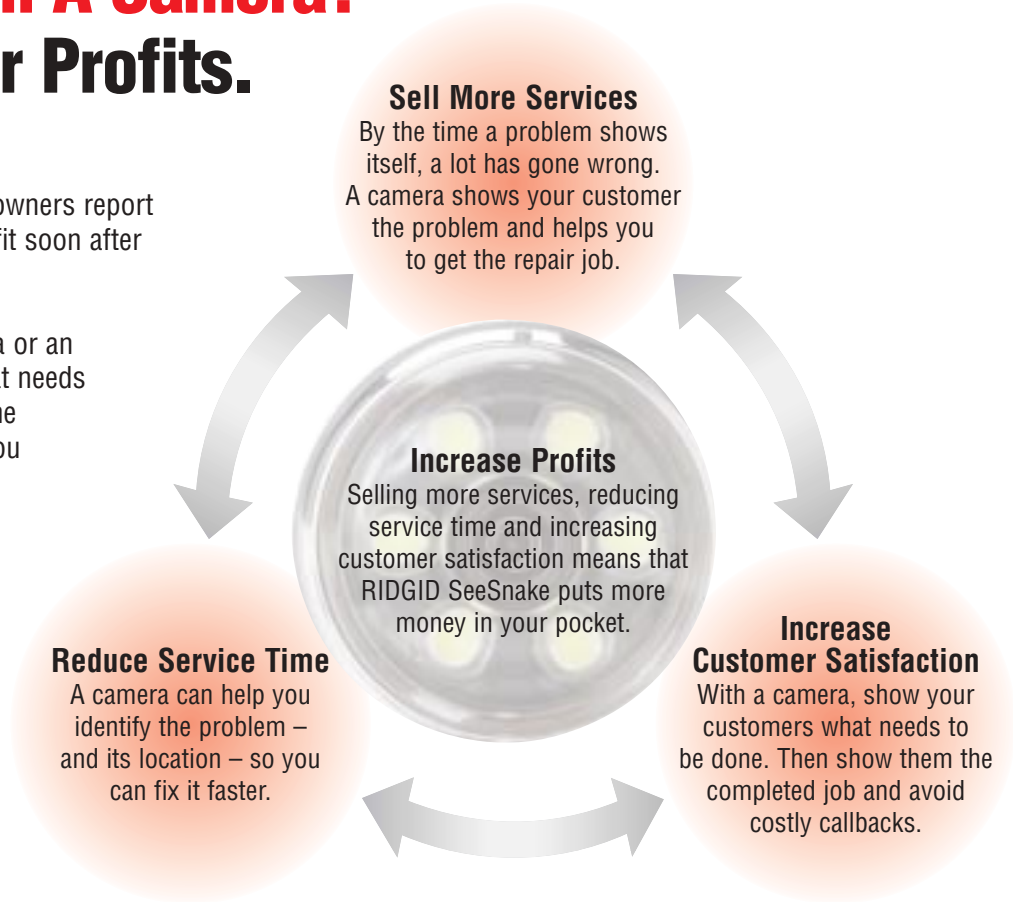

Pipe Inspection Equipment

Why Invest In A Camera? To Grow Your Profits.

More than 95% of SeeSnake owners report increasing their sales and profit soon after purchasing their camera.

Whether it is your first camera or an additional camera, seeing what needs to be done and proving that the job was done right, enables you to make more money.

“Since the decision was made to provide all the trucks in our fleet with RIDGID SeeSnakes, we have seen an increase of revenues. I would have to say that this equipment has paid for itself within a very short time. The key to our success is that we use RIDGID SeeSnakes every time we clean a drain or sewer for a client.”

David Pomales, Scott's Services

If you are involved in plumbing or mechanical contracting, plumbing service and repair, building and facility maintenance, or inspection services, a camera can be a powerful tool to help you grow. As you look to grow – some applications to consider:

Applications Include

Drain Line, Waste and Plumbing	Industrial and In-House Maintenance	Home Inspections
<ul style="list-style-type: none"> • Drain & Sewer Lines • House Laterals • Clean Outs & Vent Stacks • Slabs • Septic Lines & Tanks • Water Lines & Heaters • Yard & Floor Drains • New Construction 	<ul style="list-style-type: none"> • Process Lines • Heating & Cooling Ducts • Conduit • Exhaust Vents • Tanks & Voids • Heat Exchange Tubes • Steam Lines • Valve Operations 	<ul style="list-style-type: none"> • Chimneys • Attics • Wall Interiors • Crawl Spaces • Drain or Water Lines • Pools & Spas • Heating & Cooling Ducts • Wells

Why Choose a RIDGID SeeSnake?

SeeSnake set the standard for ruggedness, durability and performance...

"I've tried other cameras and I've learned my lesson. When it comes to cameras, I only purchase RIDGID SeeSnake. They are simply the best cameras out there."

Gary Oirich, Cross Brothers Plumbing

...Now SeeSnake *Plus* sets those standards even higher with the toughest, best performing camera we've ever made.

SeeSnake cameras have the durability and dependability that you can count on job after job. Now, the completely redesigned SeeSnake Plus offers new features that make SeeSnake cameras even tougher and better performing.

- + Inspect Farther Down the Line** ↔ Stiffer push rod lets you push your camera longer distances.
- + Most Durable** ↔ 100% stainless steel camera head and new, heavy-duty lighting system for better wear resistance.
- + Clearer Picture** ↔ New camera and high intensity lights offer better resolution and better illumination to see the problem better.
- + Faster Locating** ↔ 30% more powerful factory installed, flexible transmitter to help locate the problem faster.
- + Smaller Camera Head** ↔ New compact camera means improved maneuverability allowing SeeSnake Plus to be pushed farther through tighter spots.

NEW

SeeSnake Plus

**2" – 12" Lines
(2" 90s and 3" P-Traps)**

- Your work is primarily in lines 4" – 12".
- You do not plan on inspecting lines less than 2".
- Your inspections may run 200' or longer.
- You want the best, most versatile camera.
- The best choice if you plan to buy only one camera.

NEW

Self-Leveling SeeSnake Plus

**2" – 12" Lines
(2" 90s and 3" P-Traps)**

- All the features of the new SeeSnake Plus, now in a rugged, maneuverable, self-leveling camera.
- 100% hardened stainless steel construction.
- 6 rugged high-intensity lights.
- Tungsten weighting system produces always-upright picture.
- Unique bearing and slip ring design.
- Choose SeeSnake Plus Self-Leveling for the ultimate in performance.

Note: Self-leveling camera head accessory fully compatible with all standard SeeSnake reels.

Color Video Toolcase

- 5" Color LCD Monitor
- Commercial Grade VCR
- Hands-Free Audio Recording
- Volume & Audio OFF Control
- Sealed Rechargeable Battery
- AC/DC Connector Charges Battery When Plugged Into Outlet

B&W Toolbox Monitor

- 5.5" Monitor – Black & White
- Video In/Out Jack
- 14.4V Rechargeable Battery
- Plug For Use w/115V/230V Outlet

Monitor Pack (B&W or Color)

- 5" Monitor – Black & White
- 5" LCD Monitor – Color
- 14.4V Rechargeable Battery
- Plug For Use w/115V/230V Outlet

Call 1-800-769-7743 or visit www.ridgid.com/seeit for more information or to schedule a demonstration.

Revolutionary Self-Leveling Camera Built SeeSnake Tough

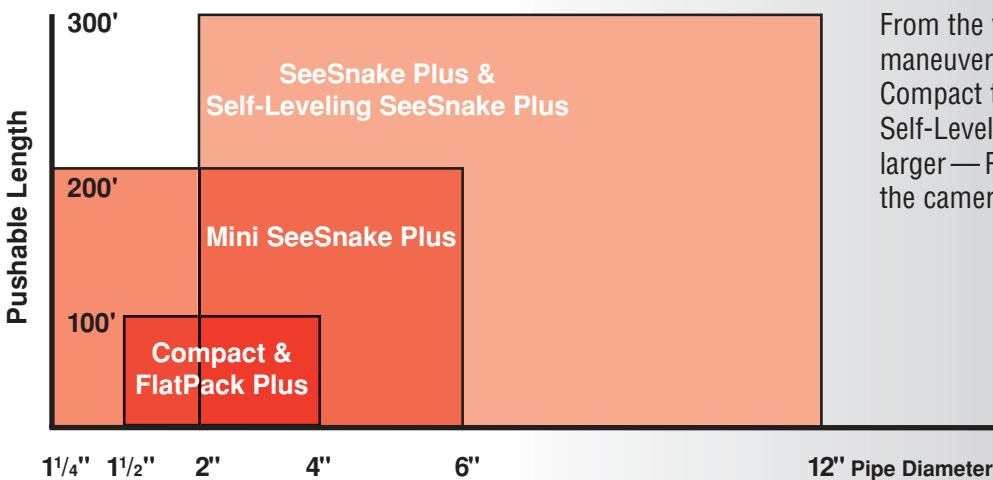

SELF-LEVELING

The new self-leveling color video camera combines SeeSnake durability with an innovative, self-leveling camera head for a consistently upright picture. Smaller, more durable, and more maneuverable than any other self-leveling camera on the market, this extraordinary camera is compatible with all standard SeeSnake inspection systems.

- Smallest self-leveling camera available – Inspects 2" 90s and 3" P-traps
- Tungsten weighting system produces reliable, consistently upright picture.
- Patent pending Teflon® bearing and slip ring design has few moving parts for increased reliability.

RIDGID Has The SeeSnake To Meet Your Needs

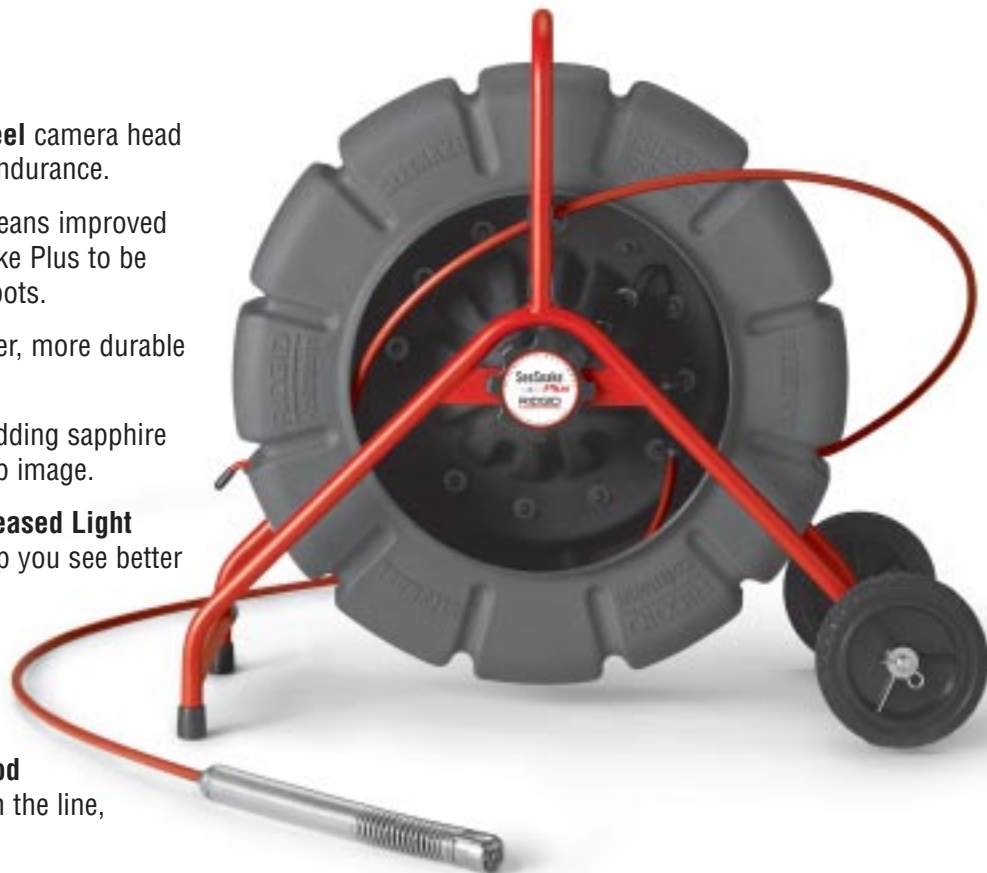

From the versatile SeeSnake Plus, maneuverable Mini and portable Compact to the revolutionary Self-Leveling — for 1 1/4" lines and larger — RIDGID SeeSnake Plus has the cameras to meet your needs.

Open the page to select the SeeSnake camera that is best for your demanding applications.

SeeSnake Plus Features At A Glance

- **100% Hardened Stainless Steel** camera head and spring assembly for added endurance.
- **Up to 28% Smaller** camera means improved maneuverability allowing SeeSnake Plus to be pushed further through tighter spots.
- **Thicker Light Shield** with larger, more durable high intensity lights.
- **Scratch-Resistant**, debris-shedding sapphire crystal lens provides a clear, crisp image.
- **Improved Camera Offers Increased Light Sensitivity** and Resolution to help you see better in the line.
- **30% More Powerful.** Factory installed Flexmitter™ (flexible transmitter) makes locating easy.
- **Stiffer, More Durable Push Rod** enables you to push farther down the line, inspecting longer distances.
- **Tapered Spring Design** is engineered for tight spots.
- **Enclosed Debris-Capturing Drum** keeps the jobsite cleaner and you looking more professional.
- **Mercury Free Slip Ring** with redundant connectors for long life. Tested to over 1 million cycles.

- **Footage Counter** to display distance on monitor.
- **UL and CUL Listed** meets OSHA requirements.
- **Every System is tested and guaranteed waterproof to 330'.**

“The SeeSnake is one of the best tools RIDGID has to offer. It allows me to locate and identify problems in areas that are physically impossible to see. We also use the SeeSnake on new school construction to map out the plumbing profile under the slab, and to identify potential problems before we take possession of the facility. The SeeSnake is one of the best allies that a building owner can have.”

Garri Hall, Plumbing Foreman, Williamson County Schools

Call 1-800-769-7743 or visit www.ridgid.com/seeit for more information or to schedule a demonstration.

NEW

Compact & FlatPack Plus

1½" – 4" Lines

- Compacts and FlatPacks combine SeeSnake durability in our most portable system.
- Under 20 lbs., these systems offer fast set up and quick inspections.
- Ultra portability makes these cameras excellent complements to your SeeSnake Plus.
- Your choice when portability or storage space is important and your inspections run up to 100'.

NEW

Mini SeeSnake Plus

1¼" – 6" Lines (1¼" 90s and 2" P-Traps)

- At 25 lbs., the Mini combines portability with an excellent camera used to inspect lines up to 200'.
- Equipped with a stiffer push rod than the Compact and FlatPack, the Mini is designed to push farther through tighter spots.
- Choose Mini SeeSnake Plus when portability and maneuverability are critical (multi-story buildings, rooftops, confined areas, etc.).

High Resolution Monitor And Control Systems

All RIDGID SeeSnake cameras are compatible with our high-resolution monitors and control systems. That means you can tailor your camera to best meet your needs.

All Systems Include:

- High Resolution Monitors
- LED Control for Precise Lighting
- Transmitter Activation
- Power Supply

Monitor + VCR (B&W or Color)

- 9" Monitor – Black & White
- 10" Monitor – Color
- Optional Commercial Grade VCR
- Hands-Free Audio Recording
- Volume & Audio OFF Control

NaviTrack Line Locating Equipment

Locate Your SeeSnake Using NaviTrack® And Work With Confidence

NaviTrack navigates you to the location of SeeSnake quickly and easily. It also tracks energized lines and utilities with ease.

NaviTrack Advantages:

Features	NaviTrack	Conventional Locators
Antennas	6	2-2
Search Function	Yes	No
Map Function	Yes	No
Gain Control	Automatic	Manual
Depth Reading	Continuous	Push Button
Background Noise Reduction	Yes	No
Standard Frequencies	25	2-4

"Absolutely fantastic! Locators were the most feared piece of equipment. Now everybody on our staff is going to be able to locate."

*Bill Schwandt of Ryan's Modern Sewer Cleaning
Grand Rapids, Michigan*

"Roto Rooter uses RIDGID SeeSnake cameras paired with the new NaviTrack system on all excavations because they make for smoother and more profitable jobs. RIDGID tools gives us the dependable service with no guesswork and that means no surprises for our customers."

Bill Kane, Roto-Rooter Northeast Region

The Key Is NaviTrack's 6-Antenna Technology

Unlike conventional locators, NaviTrack has 6 multi-directional antennas. These antennas, when combined with sophisticated software, make locating incredibly easy.

- Reduces Misleading Signals
- No "Nulls"
- No "False Peaks"
- No Special Instructions On How To Hold Locator
- Approach Target From Any Direction

ORDERING INFORMATION

SeeSnake Systems consist of a SeeSnake Reel and a Monitor/Control Unit. Each Reel is compatible with all Monitor/Control Units. Simply choose color or black & white, and 115V or 230V operation.

SeeSnake Plus is part of the RIDGID family of pipe maintenance and diagnostic equipment, each backed by the RIDGID Lifetime Warranty.

SeeSnake™

Regardless of size or application, RIDGID SeeSnakes are the toughest, quickest, most reliable way to inspect pipes, drains, conduit, and other miscellaneous tight spots.

NaviTrack®

The RIDGID NaviTrack employs 6 multi-directional antennas for unmatched accuracy. Whether you're tracking a SeeSnake or locating utility lines, the NaviTrack provides a simple map to use as a guide. And with twenty-five frequencies, the only thing you won't find is a reason not to buy it.

Drain Cleaning

Once you've identified and located the blockage, the rest is easy. RIDGID drain cleaning machines tackle 1/2" to 24" pipes, and virtually everything in between. And with hundreds of products from which to choose, RIDGID offers the most comprehensive line of drain cleaning equipment anywhere.
